

LOGAN GROWTH Q3 | 2022 REVIEW AND A LOOK AHEAD¹

MARKET ENVIRONMENT

Geopolitical uncertainty continued to rule the day in the third quarter of 2022. The beginning of the quarter saw a brief break from the global issues as investors turned their attention to how well companies can perform in a challenging economic environment. Investors rewarded companies with management teams that have been able to balance the current challenges and continue to produce profits, find new customers, and expand their competitive edge.

Our team has invested in challenging times before and it is periods like the current one where new leadership emerges in many industries and those companies that are unable to adapt see their business erode. Inflation, including higher energy and commodity prices, is making competing for market share with lower prices an incredibly challenging strategy. Logan's growth portfolios have always looked for those companies that are adding value by

understanding what their customers want and providing it at a fair, and often premium price.

PORTFOLIO REVIEW

When we look at the names of those that performed best during the quarter, the common thread is a focused management team who has stayed on course with a well-thought-out long-term business plan and a proven record of running a profitable business. Innovation is important and it must be combined with the ability to make innovative ideas profitable.

PORTFOLIO OUTLOOK

We have entered a period when growth may be more challenging and capital more expensive and harder to come by as the stimulus provided to fight COVID-19 responses expires. In a period of easy and accessible capital, innovation without profits can work, but when free and easy money goes away, results matter. Our team expects to see some solid opportunities emerge for

those companies with the resources to take advantage of them.

The growth portfolios continue to favor where we see relative leadership in earnings performance. The strategy is focused more on the US and has an overweight in innovative and profitable users of technology across all sectors. We also favor the more affluent US consumer where employment and personal balance sheets remain strong. We continue to see pent-up demand driving spending, particularly as consumers focus on services like travel.

Geopolitical uncertainty remains an issue and we expect it will for some time. Our response to the uncertainty is not significantly different from challenging times in the past which is to make sure we own the best managed business in each industry that also has loyal customers who can still spend and a long-term plan to grow and lead.

N.M. - Information is not statistically meaningful due to an insufficient number of portfolios in the composite for the entire year.

Logan Growth Composite contains fully discretionary mid to large cap growth equity accounts, measured against the Russell 1000 Growth Index. You cannot invest directly in an index. The Russell 1000 Growth Index measures the performance of the large-cap growth segment of the U.S. equity universe. It includes those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth values. It has been constructed to provide a comprehensive and unbiased barometer for the large-cap growth segment. The benchmark selected includes the reinvestment of dividends and income, but does not reflect fees, brokerage commissions, withholding taxes, or other expenses of investing. This benchmark is used for comparative purposes only and generally reflects the risk and investment style of the composite. The Sharpe Ratio is included to help investors understand the return of an investment compared to its risk. The ratio is the average return earned in excess of the risk-free rate (90 Day U.S. TBill) per unit of volatility or total risk.

The strategy invests in US securities with a market capitalization over \$1 billion at time of purchase. A small portion of the strategy (<10%) can be invest in ADR's and Canadian common shares. Turnover is low, typically under 35% and holdings range between 30 and 40 positions. Only accounts paying commission fees are included. The minimum account size for this composite is \$100 thousand.

Logan Capital Management, Inc. claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Logan Capital Management, Inc. has been independently verified for the periods April 1, 1994 through December 31, 2021. A copy of the verification report(s) is/are available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedure for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Logan Capital Management, Inc. is a privately owned Pennsylvania-based investment adviser registered with the Securities and Exchange Commission under the Investment Advisers Act of 1940. Registration as an investment adviser does not imply a certain level of skill or training. The verbal and written communications of an investment adviser provide you with information you need to determine whether to hire or retain the adviser. The firm maintains a complete list and description of composites, which is available upon request.

Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Past performance is not indicative of future results. The U.S. Dollar is the currency used to express performance. Returns are presented gross and net of management fees and include the reinvestment of all income. Gross of fee returns, have, however, been reduced by all actual trading expenses. Net of fee returns are calculated net of actual investment management fees & actual trading expenses. Prior to 2020, the annual composite dispersion presented is an asset-weighted standard deviation calculated for the accounts in the composite the entire year. Equal-weighted dispersion is presented for 2021 and going forward. Additional information regarding the policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

The investment management fee schedule for non-wrap accounts is as follows: 65 basis points on the first \$25 million, 55 basis points on the next \$25 million, 45 basis points on the next \$25 million and 35 basis points on the next \$25 million. Fees for accounts with over \$100 million in assets are negotiable. Minimum fee is \$32,500. Actual investment advisory fees incurred by clients may vary.

The Logan Growth Composite was created April 1, 1995.
