

Logan Growth

Logan Growth (LG) is a mid to large cap Growth strategy that works well as a core growth strategy focusing on U.S.-traded companies with the potential to grow earnings at a faster rate than the average stock. The strategy's goal is to provide long-term returns that meet or exceed the Russell 1000 Growth index over a full market cycle.

Unless otherwise noted, performance of indices does not account for any fees, commissions or other expenses that would be incurred. Returns do not include reinvested dividends. The Russell 1000 Growth Index measures the performance of the large-cap growth segment of the U.S. equity universe. It includes those Russell 1000 companies with higher price-to-book ratios and higher forecasted growth values. It has been constructed to provide a comprehensive and unbiased barometer for the large-cap growth segment. Diversification does not guarantee a profit or protect against a loss in a declining market. It is a method used to help manage investment risk.
