

Logan International Dividend ADR

Logan International Dividend ADR (ADR) strategy has a total return approach, seeking both income and capital appreciation, with a record of outperforming its benchmarks with lower risk over time. Our bottom-up selection process identifies 35-45 American Depository Receipts (ADRs) and common stocks of non-U.S. companies traded in the U.S. with high dividend yields and a longer-term investment horizon, primarily in the developed markets

BENCHMARK FTSE Developed x US

INVESTMENT STYLE 35-45 holdings **diversified** across 7-11 sectors and 10+ countries, with **minimal exposure** to emerging markets • Screen ADR universe for dividend-paying stocks with minimum market caps of >\$10 billion (250-300 companies total) • From this investable universe, we research for low payout ratios, strong balance sheets, and strong cash flows, then extensively analyze financial statements and company fundamentals to make final selection of 35-45 holdings

PERFORMANCE HIGHLIGHTS Higher than average dividend yield • Tax friendly 15% average annual portfolio turnover and excellent downside protection

PORTFOLIO MANAGEMENT

Bill Fitzpatrick, CFA, and Dan Gruemmer, CFA, have over a 21-year average of investment tenure. Bill has co-managed Logan ADR portfolio since 2019, and Dan has co-managed Logan ADR portfolio since 2022.

Indices are unmanaged and investors cannot invest directly in an index. Unless otherwise noted, performance of indices does not account for any fees, commissions or other expenses that would be incurred. Returns do not include reinvested dividends. The FTSE Developed ex US Index is part of a range of indexes designed to help US investors benchmark their international investments. The index comprises Large (85%) and Mid (15%) cap stocks providing coverage of Developed markets (24 countries) excluding the US. The index is derived from the FTSE Global Equity Index Series (GEIS), which covers 98% of the world's investable market capitalization. Portfolio holdings are subject to change without notice. All recommendations are based upon our experience and may or may not have been profitable in the past, now or in the future. Investing internationally carries additional risks such as differences in financial reporting, currency exchange risk, as well as economic and political risk unique to the specific country. This may result in greater share price volatility. Shares, when sold, may be worth more or less than their original cost. Diversification does not guarantee a profit or protect against a loss in a declining market. It is a method used to help manage investment risk.
