

Logan Dividend Performers

Both timely and timeless, **Logan Dividend Performers (DP)** is an equity-based strategy investing exclusively in 35–50 high-quality companies with consistent growth in dividends and market capitalizations exceeding \$2 billion. The strategy’s low beta and low standard deviation suggest the portfolio has the potential to outperform in down markets while still participating in up markets.

BENCHMARK S&P 500

INVESTMENT STYLE Investments possess inherent defensive characteristics that can protect wealth during down markets • All candidates must demonstrate at least five consecutive years of dividend growth and market capitalizations exceeding \$2 billion • Candidates must demonstrate consistent growth in earnings, revenues, and dividends; a sustainable competitive advantage; high free cash flow; and superior margins and solid ROE • Portfolio provides low turnover, potentially a tax-efficient complement to a variety of investment models

PERFORMANCE HIGHLIGHTS A potentially “win by not losing” approach where expectations are often greatest during periods of market weakness • Portfolios designed to complement more aggressive concentrated investment alternatives and fixed-income portfolios
